

Biologique Recherche...

Pierre-Louis Delapalme

Rupert Schmid

Docteur Philippe Allouche

Josette Allouche (Founder)

Yvan, Josette and Philippe Allouche, a biologist, a physiotherapist and a doctor, combined their knowledge and passion to write a unique and visionary page in the history of skin care. When the company was founded thirty-five years ago, it functioned like a research and development laboratory whose sole vocation was to develop formulations for professionals dissatisfied with existing products.

Today, the Biologique Recherche Methodology has a reputation for astounding effectiveness based on a clinical approach to beauty care using pure, concentrated and raw ingredients, as well as innovative and meticulous protocols and procedures.

Philippe Allouche, a clinical doctor, showed an early interest in the profoundly different approach taken by his parents on skin care. In the early 2000's, he gradually took over the creative side of the business

35 years of passion...

from his father Yvan. His experience in internal medicine gave him a holistic approach to the skin as an organ directly interconnected to all the other vital body functions. In addition, his work in intensive care units gave him expertise in organ reactions to acute stress. All these experiences allowed Dr. Allouche to add a new dimension to the brand's own special techniques.

Today, Philippe Allouche is the guarantor of Biologique Recherche's unique philosophy and know-how in high-end personalized beauty care. Biologique Recherche is an international brand available in more than 50 countries.

The Ambassade de la Beauté, its flagship beauty institute, is located at the prestigious 32 Avenue des Champs-Élysées.

An introduction to Biologique Recherche:

Authenticity and harmony

is the spirit and essence behind Biologique Recherche skin care products which all boast the following specific characteristics:

- High concentrations (over 20% in most products) of botanical, marine and biological extracts.
- No artificial fragrances to preserve the integrity of the formulas and lower the chance of allergic reactions.
- Cold made formulations to preserve the structure of active ingredients.
- Highest quality of active ingredients available.
- Products formulated to work synergistically with Remodeling Face® Machine for immediate, dramatic results.

Methodology...

Our original methodology is based on the following three fundamental stages which are summarized below to guide the reader throughout this brochure.

1

The Assessment Stage:

Using a specific physiological, behavioral and tactile approach, each person's Skin Instant®, which is the condition of the skin at any given time, is assessed so that the most appropriate tailored beauty treatment can be recommended.

2

The Initialization Stage:

Like many skin specialists, Doctor Allouche believes that the epidermis is central to skin care. It is the skin's outer layer and the ultimate barrier that protects the integrity of our inner world. The epidermis should receive customized treatments applied according to a precise and rigorous ritual. At Biologique Recherche, we believe this stage is essential.

3

The Treatment Stage:

During this stage, products containing the highest concentrations of active ingredients are applied to "re-condition" the epidermis and help activate both its regenerative properties and those of the skin's deeper structures. The skin is a complex organ designed for protection and communication that regenerates miraculously every month throughout our entire lives. The unique benefits of these cutting edge, customized skin care treatments are both immediate and lasting, even for particularly imbalanced Skin Instants®.

The Skin Instant®

To put it simply, our skin can be compared to a house. If the roof is built badly and cannot guarantee protection against external aggressions, everything inside is subject to stress and becomes vulnerable. First, one must take a closer look at the epidermis to create a surface for youth and radiance. This approach to observe how the epidermis is constantly communicating with the skin's deeper structures is known as "interface cosmetology". It enables an understanding of how cosmetic active ingredients can provide noticeable benefits to skin when only applied topically to the epidermis.

*Doctor Philippe Allouche's "Out-of-the-Box"
Vision of the Skin*

A person has not only one, but several skins. Our skin's condition changes numerous times in a single day, as well as during the course of our lifetimes. Everyones personal Skin Instant® evolves dramatically throughout the course of one day. The artificial categorization of skin as normal, dry or oily provides a poor physiological definition of a skin's condition, giving only a stationary image of the epidermal cosmetic imbalances. The same epidermis can present both balanced and dehydrated zones, as well as hyper-secretion of sebum simultaneously. Inappropriate treatment can easily lead to new imbalances or reactivate old ones. For example, an over aggressive product

for so called "oily" skin can cause epidermal hydration problems, while a comedogenous or over-rich product used on formally hyper-seborrheic, now apparently balanced skin, can trigger a recurrence of the earlier condition. Lastly, external factors such as climate, temperature, air-conditioning, tobacco, and pollution, as well as internal factors such as stress, sexual hormones, hygiene and age, all affect the skin. This explains the importance of properly diagnosed Skin Instants®. Biologique Recherche professionals are trained to analyze all of these variables and advise women and men on the treatment that is best suited to their particular Skin Instants®.

=

initiali

*The skin is cleansed and prepared to restore
the epidermis' natural regenerative properties.*

zation stage

The Initialization Stage is a crucial part of the Biologique Recherche Methodology. During this stage, the epidermis is thoroughly cleansed, its pH is balanced, it is gently exfoliated and its proteo-lipidic film is restored. Impurities and dead cells are gradually brought to the surface and eliminated. After this stage, which includes make-up removal, gentle exfoliation and a mask, the skin is ready to receive the Treatment Stage products.

FACE CARE COSMETIC PREPARATIONS

Cleansing Care

Our face care cleansing products remove all traces of make-up and pollution. The active ingredients initiate the beauty treatment and leave the skin soft and clean. These products are used in the first stage of every Biologique Recherche beauty care program in the morning and in the evening. Eye make-up should be removed first, with a clean cotton pad.

Result: gently removes impurities and make-up and protects the skin's hydrolipidic film.

Lait U:

This non-oily, fresh cleanser protects skin's natural moisture levels. It is recommended for young, normal Skin Instants, and combination and/or seborrheic skin.

Result: cleans and moisturizes.

Lait E.V.:

This soothing cleanser gently eliminates impurities and protects skin's natural moisture levels to leave velvety soft skin. It is recommended for dehydrated and/or devitalized Skin Instants.

Result: removes make-up, soothes, tones and hydrates.

Eau Micellaire Biosensible:

This gentle micellar formula combines hydrating and toning qualities with soothing and gently cleansing qualities. The skin is fresh and clean without destabilizing the hydrolipidic film. It is ideal for sensitive, reactive and weakened Skin Instants.

Result: cleanses and unifies skin exposed to harsh climates and/or pollution.

Lait VIP O2:

This "antipollution" cleanser eliminates impurities, calms the epidermis, and brightens and unifies the complexion. It is ideal for people exposed to harsh, dry climates, pollution or frequent travel and is recommended for stressed, devitalized Skin Instants.

Result: gently removes make-up from the eye area.

Solution Démaquillante pour les Yeux:

This multi-phase make-up remover cleanses the eye area, respecting the sensitive, delicate skin without leaving a greasy film. This fluid combines make-up removal with a soothing treatment. It is suitable for all Skin Instants, even the most sensitive.

Lotions P50

The Lotions P50, P50V and P50W, balancing exfoliators, are the culmination of 30 years of reflection and experience.

The Lotions P50 balancing exfoliators speed up the epidermis' natural exfoliation process and the reconstruction of the epidermal shield. The fortified epidermis can then effectively fulfill its protective functions, thus enhancing skin's self-regeneration potential. Lotion P50, our most famous and coveted product, is the cornerstone to Biologique Recherche skin care treatments. All Biologique Recherche skin care treatments, whether administered at home or in a beauty institute, start with the "P50 ritual" in the morning and evening. This lotion gently exfoliates the skin, regulates excess sebum secretion, moisturizes and helps maintain the epidermis' acid pH. It prevents and treats in-growing hairs, making it ideal for pre- and post- shaving skin care.

Result: gently exfoliates and balances the epidermis.

Lotion P50:

This gentle, balancing exfoliator is recommended for seborrheic and/or hyper-keratinized Skin Instants.

Result: gently exfoliates and balances the epidermis.

Lotion P50V:

This gentle, balancing, vitamin-enriched exfoliator tones and lightens the skin. It is recommended for less toned and/or devitalized Skin Instants.

Result: gently exfoliates and balances the epidermis.

Lotion P50W:

This is the gentlest exfoliator with a formula rich in anti-inflammatory active ingredients. It is recommended for sensitive Skin Instants.

Application method:

The first week, apply a few drops of the lotion onto a damp cotton pad and gently pat over face, neck and décolleté, beginning with the décolleté and working up toward the face. Rinse off Lotion P50W with L'Eauxygénante. After the first week, apply Lotion P50W on a dry cotton pad without rinsing it off after application.

FACE CARE COSMETIC PREPARATIONS

Specific Exfoliators

These products can either complement P50 with their replumping effect (MC 110) or be used in lieu of P50 (Lotion Alpha Kérato-Régulatrice) to treat particularly devitalized or keratinized Skin Instants®.

Result: smoothes surface irregularities and redefines the contours of the face. Skin appears smoother and brighter.

Lotion MC 110:

This restructuring Lotion exfoliates and tones the epidermis, while smoothing lines and wrinkles. It is used to supplement recommended Lotion P50.

Lotion MC 110 N°1: Recommended for normal skin.

Lotion MC 110 N°2*: Recommended for thick, dull skin.

Application method:

Apply a few drops of Lotion MC 110 on a cotton pad and pat in gentle outward motions, concentrating on the nasolabial lines and cheekbones.

**For professional use only*

Result: smoothes the epidermis and improves its natural moisturizing processes.

Lotion Alpha Kérato-Régulatrice:

This fruit acid lotion exfoliates and renews the epidermis and is recommended for devitalized, keratinized and/or dull Skin Instants.

Application method:

Apply Lotion Alpha Kérato-Régulatrice with a cotton pad morning and evening to face, neck and décolleté, working upward. Use the lotion for a 5 to 8 day course of treatment once a month (according to skin type). Do not use Lotion P50 while you are using Lotion Alpha Kérato-Régulatrice. We strongly advise avoiding excessive sun exposure during this treatment.

Beauty care mist

Result: brightens the complexion and prolongs make-up hold.

L'Eauxygénante:

This moisturizing, antioxidant and oxygenating mist stimulates the epidermis, enveloping it in a protective veil. It contains high concentrations of Vitamins A and C, extracted from Orange and Kiwi cells, as well as Edelweiss extract, which has potent anti-free-radical properties, and the Specific Biologique Recherche Oxygenating Complex. This facial spray preserves the epidermis' acid pH and is recommended for all Skin Instants.

Application method:

Shake before use. Hold the bottle about 12 inches away from the face and spray on as a mist:

- after using the recommended Lotion P50 balancing exfoliator
- to rinse off Lotion P50W
- to rehydrate the skin after removing a mask
- before and/or after a cream or as a mist over make-up to brighten the complexion
- to refresh instantly at any time of the day.

Purifying and Stabilizing Masks

These are the last products that are applied before the Treatment Stage. They contain high concentrations of active ingredients to balance and purify the epidermis and preserve all the benefits of previous treatments performed. They contain Essential Fatty Acids to replenish the skin's proteo-lipidic film after exfoliation and to prepare the skin for the products that are applied during the Treatment Stage.

Unlike other brands, at Biologique Recherche, the masks are applied in the middle of the skin care program and not at the end.

This is done deliberately to avoid removing the active ingredients used in the Treatment Stage when removing the mask.

Result: soothes, softens and brightens the skin.

Masque Biosensible:

This fresh, luxurious cream mask is enriched with Fatty Acids, Hyaluronic Acid, anti-stress actives and the Specific Biologique Recherche Oxygenating Complex. Its formula contains high concentrations of active ingredients renowned for their high tolerance. It soothes and softens your skin. Men can also use Masque Biosensible to protect their skin from shaving irritation. It is recommended for dehydrated, sensitive and reactive Skin Instants.

Result: brightens, tones and refreshes the complexion.

Masque Vivant:

This balancing mask contains high concentrations of Yeast, Cucumber and Witch Hazel extracts, known for their skin purifying properties. It is recommended for seborrheic, dull and/or less toned skin.

Tip:

For seborrheic skin, mix a pinch of baking soda and a few drops of Complexe Iribiol with Masque Vivant and apply the frothy mixture in a thin layer over the entire face, neck and decollete.

FACE CARE COSMETIC PREPARATIONS

Purifying and Stabilizing Masks

Result: leaves the skin beautifully soft and glowing.

Masque VIP O₂:

This oxygenating and moisturizing “antipollution” treatment restores radiance to stressed, asphyxiated skin. Its formula is rich in moisturizing botanical ingredients and contains the Specific Biologique Recherche Oxygenating Complex, which stimulates epidermal regeneration and revitalizes the skin. It is ideal to soothe sunburn and can be refrigerated prior to use and applied in a thick layer to soothe and calm the skin. It is recommended for dull, tired and/or stressed Skin Instants.

Result: unifies and brightens the complexion.

Biomagic Mask:

This energizing mask is formulated with a subtle combination of mineral ingredients. It leaves the skin glowing, soft and purified and is recommended for devitalized and/or less toned Skin Instants.

Application method:

Apply and leave for about 10 minutes moistening occasionally with L'Eauxygénante mist spray. Rinse off with warm water.

Result: smoothes wrinkles and fine lines and unifies the complexion.

Masque Crème Biofixine:

This toning anti-wrinkle treatment is both a mask and a cream. It is an innovative multifunctional product that tones and smoothes the epidermis, leaving the skin feeling wonderfully soothed. It is recommended for devitalized Skin Instants showing visible signs of aging.

Result: leaves the skin supple and fresh and the complexion radiant.

Masque Visolastine:

This mask combines elastin with the Polyunsaturated Fatty Acids Complex to moisturize and improve skin elasticity. The light texture of White Clay purifies the pores without drying the skin. It is recommended for dehydrated Skin Instants.

Result: moisturizes and revitalizes the epidermis.

Masque Visolastine E.:

This moisturizing, regenerating mask brightens and refreshes the complexion. It is ideal for dehydrated, devitalized Skin Instants.

Application method:

For use as a mask:

Apply a thick layer over all the face, neck and décolleté. Remove any excess with a moist cotton pad.

For use as an anti-wrinkle cream

for balanced or seborrheic skin: Apply a very thin layer in the morning or in the evening over the entire face, neck and décolleté. Massage the face in ascending movements until the cream has been completely absorbed.

Masque Crème Biofixine is applied after the recommended Lotion P50 and the quintessential serums.

Professional products

Since its introduction, Biologique Recherche has produced a range of cutting-edge products for use solely by professionals who have received training from Biologique Recherche. These highly technical products are used differently depending on the individual skin analysis. They contain high concentrations of active ingredients and provide instant results when used according to the Biologique Recherche Methodology.

Result: exfoliates, reconditions and unifies the skin.

Masque Exfoliant P50 Visage*:

This smoothing, unifying mask is formulated to help prevent premature aging of the skin and brighten the complexion.

It is recommended for keratinized, dull Skin Instants and/or pigmentation irregularities.

Result: exfoliates the skin and lifts and re-sculpts the face.

Lift C.V.S.*:

Lift C.V.S. enables a manual facelift. It consists of a lotion and an exfoliating, regenerating powder. Together with smoothing, vibrating and modeling movements, this product stimulates the epidermis and redefines the contours of the face. It is recommended for devitalized and/or seborrheic Skin Instants.

Result: leaves the complexion radiant and fresh.

Cold Mask*:

Cold Mask is a soothing and purifying peel-off mask. It is rich in Micronized Laminaria and Diatom Algae. It is recommended for seborrheic Skin Instants.

Result: smoothes and softens fine lines and wrinkles.

Le Soin Lissant*:

Soin Lissant is an anti-stress beauty care treatment comprised of a lotion and a powder which are mixed in doses that vary according to the skin type. This product is rich in Omega 3, Hyaluronic Acid and Silk proteins and leaves the skin smooth and soft. When combined with the smoothing and modeling movements interspersed with rapid, subtly dosed pulsations, perfected by specially-trained estheticians, this treatment has a restructuring effect. It is recommended for dehydrated Skin Instants.

Result: re-sculpts the face.

Biovecteur Marin*:

Biovecteur Marin treatment redefines the contours of the face using Woven Sheets of Japanese Red Laminaria. It is a revitalizing treatment, rich in marine oligo-elements, that leaves the skin completely re-energized. It is recommended for devitalized, wrinkled and/or tired Skin Instants.

Result: renews the skin.

Masque aux Acides de Fruits*:

Masque aux Acides de Fruits purifies and renews keratinized skin. Its formulation is rich in Apple, Grape and Ginger Fruit Acids that renew the skin. It is recommended for thick, keratinized, aging Skin Instants.

treatm

*The treatment applied during this
fundamental stage is designed to leave the
complexion beautiful and radiant.*

ent stage

This stage is the most active of the Biologique Recherche skin care program. The products that are used during this stage contain high concentrations of botanical, marine and biological extracts. When applied in accordance with the Biologique Recherche Methodology, they balance, hydrate and revitalize the epidermis. The active ingredients work progressively to improve the quality of the skin and leave the complexion radiant.

FACE CARE COSMETIC PREPARATIONS

Quintessential Serums

The Quintessential Serums are the purest formulations in the Biologique Recherche range. Their main active ingredients are amino acids and short peptides. They are designed to treat specific skin imbalances (dehydrated, devitalized, lined and/or seborrheic skin, etc.). The serums can be used alone, or mixed together. The Remodeling Face® Machine can be used to optimize their effect during treatment in a beauty institute.

Application method:

Apply the serum on clean skin over all the face, neck and décolleté using light ascending stroking movements until the product is absorbed.

Result: tightens the pores

Sérum Dermopore:

This purifying and balancing treatment has been developed in response to the specific problems of hyperseborrheic, acneic and/or hyperkeratinized with dilated pores Skin Instants. It refines the skin texture, tightens the pores, reduces the skin brilliance and unifies the complexion.

Result: smoothes the epidermis.

Sérum Elastine Pure:

This bio-serum smoothes the epidermis, helps offset the skin's loss of elasticity and also reduces the appearance of wrinkles and fine lines. It is recommended for all Skin Instants and is ideal for treatment of first wrinkles, expression lines, and the eye and mouth areas.

Tip:

Apply liberally after exposure to the sun. Extract 2 cc of Sérum Elastine Pure, mix with the after sun lotion and apply all over the body.

Result: smoothes the epidermis.

Sérum Elastine Marine:

This bio-marine serum smoothes the epidermis, helps offset the skin's loss of elasticity and also reduces the appearance of wrinkles and fine lines. It is recommended for all Skin Instants and is very well tolerated by seborrheic skin. It is ideal for treatment of first wrinkles, expression lines and the eye and mouth areas.

Results: tones the skin and tightens the pores.

Sérum Collagène Natif**:

This is a firming and astringent bioserum, with collagen as the main ingredient - an excellent firming agent. It tightens the skin's pores and improves the contour of the face. It is recommended for all Skin Instants and is ideal for dehydrated, less toned skins or for thick skins with dilated pores.

Results: firms the skin and tightens the pores.

Sérum Collagène Marin**:

This firming and astringent biomarine serum tightens the skin's pores and redefines facial contours. It is recommended for all Skin Instants, even fragile skin and is ideal for dehydrated skin and excellent for smoothing wrinkles on the neck and décolleté.

FACE CARE COSMETIC PREPARATIONS

Result: firms and tones the skin.

Sérum Spléndermine**:

This intensive firming and toning bio-serum helps accelerate epidermal cell renewal. It is recommended for dull, devitalized Skin Instants.

Result: moisturizes and revitalizes the skin.

Sérum Extraits Tissulaires**:

This moisturizing and revitalizing bio-serum soothes stressed skin and prepares it for more intensive treatment. It is recommended for all Skin Instants, even reactive skin and/or seborrheic skin and is ideal for young skin.

Result: hydrates and soothes.

Sérum Amniotique E**:

This intensive revitalizing and soothing bio-serum is recommended for all Skin Instants. It is ideal for stressed, devitalized, dehydrated and/or sensitive skin.

Result: intense hydration.

Sérum Colostrum**:

This intensely moisturizing bio-serum contains Milk proteins which enhance the skin's natural defense mechanisms and improve its elasticity. It provides emergency treatment for dehydrated, slack skin and is recommended for very dry and devitalized Skin Instants.

Tip:

For even more intensive moisturizing and toning, use Sérum Colostrum together with Sérum Elastine Pure.

Result: firms and tones the skin.

Sérum VG Tensil:

Sérum VG Tensil is a firming botanical serum. It contains Wheat proteins which tone the skin. It is recommended for dull, devitalized and/or thick Skin Instants and is ideal for combination and/or seborrheic skin.

Result: unifies asphyxiated complexions.

Sérum Oligo-Protéines Marines:

This bio-marine serum energizes and revitalizes the skin, helping stimulate its natural functions and unifying the complexion. It provides emergency treatment for stressed skin and is recommended for devitalized, dull Skin Instants with imperfections. It is ideal for asphyxiated, smokers' skin.

Application method:

This serum is applied during 1 to 2 month treatment courses, which can be repeated if necessary.

Result: balances and purifies the skin.

Complexe Iribiol:

This balancing serum helps to regulate sebum secretion and tightens the pores. It is made with Iris and Zinc extracts for customized treatment of skin imperfections. It is recommended for skin imperfections and/or combination and seborrheic skin.

Result: revitalizes and tones the skin.

Sérum Placenta**:

This repairing serum helps reduce skin imperfections, lightens the eye contour area and restores epidermal elasticity and tonus. It is recommended for skin with imperfections and/or seborrheic skin.

***These products may not be available in some countries*

FACE CARE COSMETIC PREPARATIONS

Targeted Serums

Some Skin Instants may present specific but temporary imbalances that require targeted treatment and both immediate and lasting results.

This is why Biologique Recherche has developed the Targeted Serums, a new generation of serums.

Their composition in phytobiologically and biotechnologically obtained active principles will attack the causes and consequences of observed dysfunctions.

Results: signs linked to cutaneous sensitivity are reduced immediately after application and over time.

Sérum Biosensible:

This concentrate of soothing, anti-inflammatory, moisturizing and protective ingredients restores an impaired epidermal tolerance threshold. Formulated without artificial fragrance and with enriched cellular kiwi water, it reduces cutaneous sensitivity, soothing and moisturizing weakened skin. Contained in a take-anywhere auto-dispenser bottle, it will go anywhere you go, bringing the necessary relief in case of epidermal reaction, or after surgery or a cosmetic medicine procedure. Recommended for reactive and sensitive Skin Instants.

Results: protects and prevents extreme dehydration of the skin. Skin regains a pleasant sensation of comfort.

Sérum T.E.W.L.:

Helping greatly to reinforce epidermal protection systems, this serum works like a genuine lipidic shield thanks to its formula boasting a wealth of lipid-replenishing, repairing and protective active ingredients. By preserving optimal hydration, the skin is better able to defend itself and to withstand extreme conditions of cold. May also be applied as intense dual therapy after Dermo-RL. Recommended for Skin Instants with significant lipid deficiencies or subject to extreme climatic conditions (dry and cold).

Results: activates epidermal regeneration and revitalizes the skin.

Cocktail d'Actifs Régénérants:
Chock-full of vitamins and active ingredients derived from cutting-edge biotechnology, this cocktail provides multi-benefit results, even in the case of the most devitalized Skin Instants. It activates cellular regeneration, protects against the harmful effects of free radicals and boosts the skin's protective functions while improving epidermal moisture and tone.

Results: renovates, regenerates and repairs.

Sérum 3R:

At the first sign of wrinkles, this preventive, corrective and respectful treatment stimulates the skin's intrinsic regenerative potential. This combination of 12 exfoliative, antioxidant, firming, anti-inflammatory and hydrolipidic film reconditioning active ingredients fights various deficiencies and signs of premature aging. It is ideal for devitalized and/or mature Skin Instants.

Results: brightens complexion and corrects pigmented spots.

Sérum PIGM 400:

Its formula, boosted with lightening agents twice as concentrated as those in Crème PIGM 400 provides a super-effective response to inhibited melanin synthesis. Besides, its photo-protective and anti-free radical agents slow skin aging. It is recommended for pigmented and dull Skin Instants.

FACE CARE COSMETIC PREPARATIONS

Biologique Recherche Creams

The creams are applied to the face, neck and decollete and supply balanced botanical, biological and marine elements to the skin. They supplement the actions of the Quintessential Serums, protecting the skin from external aggressions. The creams have a special texture that moisturizes without leaving an oily film. They are easy to apply and rich in active ingredients, providing optimum results with a dime-sized amount. Most Biologique Recherche beauty programs include two different creams, one for daytime and one for nighttime. Our range comprises three different types of creams: Essential Creams, Specific Creams and Intensive Creams.

Essential Creams

The Essential Creams are formulated for healthy skin and designed to preserve essential hydration levels.

Result: a stronger, more toned epidermis.

Result: tones the skin.

Crème au Collagène Marin:

This fresh cream is rich in marine extracts. It restores the skin's natural radiance and elasticity and tones the epidermis. It is recommended for combination Skin Instants.

Result: helps prevent wrinkles, moisturizes and nourishes the epidermis.

Crème Elastine Marine:

This cream prevents the formation of wrinkles and fine lines and restores epidermal elasticity. It is recommended for normal and/or dehydrated Skin Instants.

Result: moisturizes, nourishes and restores the skin's hydrolipidic film.

Crème VG Derm:

This luxurious moisturizer is rich in protective botanical extracts and re-conditioning Essential Fatty Acids. It fortifies the epidermal structure and is perfect for dry climates. It is recommended for aging, dehydrated Skin Instants and is ideal for very dry skin.

Result: moisturizes and revitalizes stressed skin.

Crème Hydravit'S:

This moisturizing cream contains extracts of Yeast and Thermal Algae. It brightens and revitalizes dull skin and is recommended for dehydrated Skin Instants.

Result: revitalizes and purifies the epidermis.

Crème Placenta:

This cream revitalizes and purifies young skin. It is recommended for combination Skin Instants with a seborrheic tendency.

FACE CARE COSMETIC PREPARATIONS

Result: Tones and brightens the skin.

Crème GS 99:

This ginseng enriched energizing cream tones the skin and helps fight loss of elasticity caused by stress and fatigue. Perfect for use at the onset of winter to stimulate the skin's protective functions, it is recommended for tired and toneless Skin Instants.

Specific Creams:

The Specific Creams are used for the targeted treatment of specific parts of the face and imbalanced Skin Instants.

Result: targeted action.

Result: unifies and protects the skin.

Émulsion Gel Biosensible:

Formulated for naturally sensitive skins, its hypoallergenic fluid texture contains highly concentrated moisturizing active ingredients, skin soothing agents derived from the latest biotechnology, Essential unsaturated Fatty Acids, as well as antioxidants. It is recommended for dehydrated, stressed and sensitive Skin Instants (not to be used on seborrheic skin).

Result: revitalizes stressed skin and unifies the complexion.

Crème Echinoderm au Complexe Bio-Marin:

This energizing marine cream tones the epidermis and unifies the complexion. It is recommended for all Skin Instants.

Result: soothes, reduces bags under the eyes and brightens the eye area.

Crème Contour des Yeux Biosensible:

This high-tolerance cream reconditions the epidermis in the eye area, soothing the skin and helping it to prepare for outside aggressions.

Result: brightens and mattifies the skin leaving it refreshed and glowing.

Crème Dermopurifiante:

This purifying cream reduces redness caused by acne and provides effective treatment for seborrheic skin without drying out the epidermis. It is recommended for imbalanced and/or reactive Skin Instants.

Result: Lightens pigment spots and makes the complexion even.

Crème PIGM 400:

This physiological treatment, a concentrate of active ingredients that lighten and protect the skin while preventing pigment spots, respects the epidermis, reduces pigment imperfections and stops the appearance of new spots. Recommended for Skin Instants presenting differences in pigment shades.

Result: actively protects dehydrated skin around the eye.

Crème Contour des Yeux:

This cream is rich in Marine elastin and Polyunsaturated fatty acids. Its velvety texture improves epidermal elasticity and moisturizes and tones the eye area.

Result: supple, moisturized skin.

Crème UVA:

This moisturizing cream is ideal for use before applying sunscreen to protect the skin from chemicals found in SPF. Recommended for all Skin Instants.

Result: soothes and unifies the complexion.

Crème Verte Espoir:

The soothing and balancing cream contains high concentrations of repairing botanical extracts that revitalize the epidermis. It is recommended for reactive Skin Instants.

Result: smoothes and tones the eye area and reduces bags under the eyes.

Crème Contour des Yeux VIP O2:

This cream's unique oxygenating and moisturizing formula combines Polyunsaturated Fatty Acids with the Specific Biologique Recherche Oxygenating Complex to help reduce wrinkles and brighten the eye area.

Result: nourishes and repairs the lips.

Biokiss:

This balm protects the lips from external aggressions and is suitable for all skin types, even the most sensitive. Its thick, non-sticky formula is rich in botanical lipids with nourishing and repairing virtues.

FACE CARE COSMETIC PREPARATIONS

Intensive Creams:

The Intensive Creams are the most complex and sophisticated products. They are formulated to provide intensive treatment for skin requiring special attention.

Result: intensive treatment.

Result: redefines the contour of the face and firms the skin.

Crème MSR-H:

This intensive beauty cream brightens and refreshes aging skin thanks to its formulation of Yam and Soy extracts with the Specific Biologique Recherche Oxygenating Complex, which tones and restructures the epidermis. It is ideal for imbalances caused by aging and menopause and is recommended for mature Skin Instants.

Result: intensive firming and toning of the epidermis.

Crème Splendide:

This cream is rich in energizing active ingredients including Biologique Recherche's high efficiency Exclusive Botanical Complex and Yeast extract. Its firming effects can be seen upon the first application. It is recommended for aging, less toned Skin Instants.

Result: revitalizes the epidermis and tightens dilated pores.

Crème Amnios:

This rejuvenating, refreshing cream rich in cellular oligopeptides refines the texture of the skin, restoring its original beauty. It is recommended for normal or combination Skin Instants with a seborrheic tendency.

Result: revitalizes the epidermis.

Crème Grand Millésime:

This revitalizing beauty cream combines cellular extracts and a highly efficient phyto-biological antioxidant complex to rejuvenate the skin on a daily basis. It is recommended for devitalized Skin Instants.

Result: brightens the complexion, tones the skin and provides natural protection for the epidermis.

Crème VIP O₂:

Regenerating Agents and the Specific Biologique Recherche Oxygenating Complex make this the perfect antipollution oxygenating cream for immediate healthy skin. It is recommended for tired, devitalized Skin Instants.

FACE CARE COSMETIC PREPARATIONS

Results: replenishes the skin in moisture and lipids

Crème Dermo-RL:

A nourishing cream with lamellar structure that helps penetrate lipid-deficient epidermis, this treatment "reconditions" the skin without an occlusive effect thanks to a combination of lipids and botanical butters with low molecular weight. The epidermis is thus replenished in lipids while avoiding a sensation of oiliness. Recommended for lipid-deficient and dehydrated Skin Instants.

Result: restructures and tones the epidermis.

Crème Métamorphique:

This cream is rich in revitalizing and protecting agents that restore the skin's radiance and tone. It is recommended for mature, less toned, devitalized Skin Instants.

Result: restores the epidermis' hydro-proteo-lipidic barrier, moisturizes and prevents dehydration.

Émulsion Originelle Régénérante:

This cream's formulation combines Essential Fatty Acids and a Botanical Complex, to produce a fine moisturizing emulsion that helps prevent dry skin and calms and soothes the epidermis. It is recommended for fine and/or dehydrated Skin Instants.

Result: detoxifies, re-mineralizes and brightens the complexion.

Émulsion Végétale Grand Millésime:

This cream's formulation is rich in antioxidant, energizing and stimulating agents that purify and brighten the complexion. It is recommended for young, dull, devitalized Skin Instants and is used in two-month treatment courses, which can be repeated if necessary.

Result: revitalizes and disinfects the skin leaving a healthy peach complexion.

Crème aux Acides de Fruits:

Its velvety formulation softens and purifies the skin with a unique combination of reconstituted Natural Moisturizing Factors and a Fruit Acid Complex. This cream brightens the complexion instantly and is recommended for devitalized, dull and/or stressed Skin Instants.

Application method:

Use in a one-month treatment course combined with a moisturizer to rebuild new, exfoliated and repaired skin.

Result: smoothes and reduces wrinkles and fine lines.

Crème Biofixine:

This cream is recommended for all Skin Instants for use at the first sign of fine lines and wrinkles.

Result: nourishes, restructures and tones the skin.

Crème ADN Elastine Marine Collagène Marin:

This complete anti-aging cream uses a subtle combination of structuring proteins (Collagen and Elastin) with DNA extracts to redefine the face's natural contour. It is recommended for aging, dry Skin Instants.

Application method:

Use in 28-day treatment courses, which can be repeated if necessary.

Result: tones, moisturizes, protects and softens the skin.

Gel ADN Silkgen:

This fresh, moisturizing gel is made with an innovative formula combining DNA and Restructuring Amino Acid Silk proteins to preserve epidermal hydration. The skin is instantly silky, fresh and bright. It is ideal for frequent travelers, people exposed to dry climates or for use after plastic surgery. It is recommended for all Skin Instants.

FACE CARE COSMETIC PREPARATIONS

Finishing Serums

These serums provide the finishing touch on the Biologique Recherche face care regimen. They are sophisticated and glamorous and their special formulas provide instant and lasting effects. They can be applied both under and over creams to give the skin a natural glow and radiance. These precious fluids contain botanical extracts with a variety of vitamins and antioxidants, as well as hyaluronic acid and potent moisturizing and oxygenating DNA extracts. The finishing serums stabilize the products applied during the Treatment Stage. They make an excellent base for make-up and are perfect for use on both a daily basis and for special events. Finishing serums prolong and protect the effects of the Biologique Recherche skin care products.

Result: provides instant and long term replumping effects

Sérum Yall-O₂: Elixir de Fraîcheur Repulpant

This serum's innovative formulation, based on nano-technology and oxygenating vectors, provides intensive treatment and instant effects, which are prolonged with regular application. This replumping, regenerating elixir is a highly effective anti-aging fluid, rich in Hyaluronic Acid and antioxidant botanical extracts to restructure and protect the epidermis. It is recommended for all types of dehydrated Skin Instants.

Result: leaves the skin instantly radiant and visibly smoother.

Rénovateur 14 & Complexe Royal: Elixirs de Lumière

These two phyto-bio-complexes offer instant radiance and glow. The blend of specific, regenerating, energizing and moisturizing active ingredients in these two serums restores the skin's beauty. They can be used either alone or together and leave the complexion renewed. They are recommended for devitalized Skin Instants.

Result: regenerates and tones the epidermis, leaving the skin instantly replumped and the complexion relaxed and glowing.

Sérum Grand Millésime: Elixir Hors du Temps

This serum, rich in revitalizing, antioxidant agents and Hyaluronic Acid, instantly brightens and rejuvenates the complexion. It is an elixir of youth, beauty and glamour for use to combat signs of aging. It is recommended for all Skin Instants.

Result: Unifies the complexion, firms the skin and leaves it smoother.

Silk Plus: Elixir de Douceur

This moisturizing, smoothing serum contains high concentrations of regenerating agents, Hyaluronic Acid and Cucumber and Silk extracts to soothe the skin and leave it feeling silky soft. It is recommended for all Skin Instants.

Tips:

For women: Forms an excellent base for make-up.
For men: Highly effective when applied after shaving to soften the skin.

Result: reduces signs of fatigue, brightens the complexion and leaves the skin smoother and visibly more beautiful.

Fluide VIP O2: Elixir City Zen

The unique formula contained in this serum traps oxygen at the surface of the skin, creating an environment that stimulates the epidermis' natural functions. This "anti-pollution" oxygenating and moisturizing serum protects the skin throughout the day from urban aggressions. Its unique formulation uses revitalizing agents, Silk extracts and a Specific Biologique Recherche Oxygenating Complex to restore healthy skin. It is recommended for all Skin Instants.

Tips:

For women: Forms an excellent base for make-up.
For men: Highly effective when applied after shaving to soften the skin.

BODY CARE COSMETIC PREPARATIONS

Preparing, purifying and detoxifying the epidermis to restore its natural regenerating functions.

The preparation stage is a crucial part of the body care program and maximizes the results of the specific treatments. By working on protecting and rebuilding the epidermis, the overall quality and functions of the skin is improved. The epidermis is a dynamic structure that plays a major role in the body's defense system. For natural and physiological reasons, the body's epidermis is actually more sensitive to dehydration than the face, except for the décolleté and the back, and contains a lower density of sebaceous glands than found on the face. As we age, the cells become less cohesive and the natural exfoliation process and cellular regeneration slows down. The epidermal cells lose their initial quality and the barrier effect gradually depletes.

Biologique Recherche's body care treatments combine products and procedures that are developed with the same expertise and focus on personalization as the face care treatment.

The body care treatments detoxify, re-shape and tone the body to help restore a more balanced silhouette, smooth skin, light legs and toned buttocks.

Results: breaks down fat, eliminates and boosts the effectiveness of slimming active ingredients

Booster Minceur*:

This body-contouring dual treatment consists of two products to mix together: an enzyme-rich powder complex (Lipase and Hyaluronidase) and a tissue-clearing and veno-toning liquid complex. By improving the breakdown of fats and the elimination of excess water from tissue, the product works to ideally prepare slimming action and boost the performance of subsequently used creams. The exclusive formula was specifically created for slimming treatments dispensed in Biologique Recherche treatment rooms.

Result: gently exfoliates and balances the epidermis.

Lotion P50 Corps:

This formulation is based on the same principles as Lotion P50 Visage but adapted to body care. Use of P50 is an essential stage in preparing the epidermis. Lotion P50 Corps is rich in Poly-Alpha-Beta-Hydroxy-Acids, Nettle and Lemon extracts. Its gentle exfoliating action tones and balances skin acidity levels, preparing the body for the next treatments.

Result: re-sculpts the body and regenerates and tones the skin.

Lift Corps*/**:

This treatment is indispensable for total re-sculpting of the body. Lift Corps exfoliates, firms and tones the epidermis. It consists of a powder complex (rich in Amino Acids and Diatoms) and a liquid complex (rich in Silk extract). Lift Corps is applied using a specific massage technique available only in Biologique Recherche beauty institutes. It is suitable to prepare and repair the skin before and after the summer season or as part of firming treatment.

Result: exfoliating, stimulating body treatment that leaves the skin toned and revitalized.

Gommage P50 Corps:

Exfoliates the epidermis and rids the skin of dead cells and impurities. This exfoliator stimulates the epidermal functions by optimizing cell renewal.

Result: exfoliates and unifies the epidermis of keratinized hands.

Masque Gommage Mains:

Masque Gommage Mains contains exfoliating, moisturizing and unifying agents, which leave the skin smooth and attenuate pigment disorders. It is ideal for keratinized, dry hands and/or hands with pigmentation irregularities.

Body Wraps

Biologique Recherche has a range of special marine algae body wraps designed to help the body eliminate toxins in preparation for more intensive slimming treatments. These wraps revitalize the body and prepare it for the next specific treatments.

Result: softens, revitalizes and tones the skin.

Gel d'Algues aux Huiles Essentielles MC 110*:

This detoxifying, energizing gel formulated with Thyme, Mint, Cypress and Lemon Essential Oils, stimulates, cleanses and disinfects the epidermis. The Phyto-Plancton in the MC 110 complex tones the skin tissue. A full body wrap provides a sense of well-being and relaxation. It is recommended for cases of cellulite combined with swollen Skin Instants.

Result: cleanses and disinfects the skin leaving it glowing.

Gel d'Algues*:

Gel d'Algues lightens and unifies the skin and refines its texture. It is recommended for skin with imperfections.

Result: cleanses, disinfects and re-mineralizes the skin.

Algues Auto-Chauffantes**:

Self-heating algae eliminates dead cells and refine the texture of the skin. They contain marine salts, which stimulate, detoxify and re-mineralize the epidermis.

BODY CARE COSMETIC PREPARATIONS

Body Oils and Complexes

Biologique Recherche has a range of specific Oils and Complexes designed to treat, repair and restore the skin's beauty. They can be used alone or in combination with the creams to stimulate the effects of their active ingredients. They are rapidly absorbed and do not leave an oily residue on the skin.

Results: fights against the slackening of the dermo-epidermal matrix

Sérum Matriciel:

Firming serum that prevents slackening of the dermo-epidermal matrix by stimulating the synthesis of support proteins, collagen and elastin fibers. Works to boost the skin's elasticity and smooth epidermal irregularities. The spray packaging facilitates application to targeted areas (bust, inner arms and thighs) and the penetration of active ingredients. Recommended for toneless Skin Instants.

Result: leaves the skin supple, beautiful and silky.

Huile Bénéfique:

Huile Bénéfique softens the outer layers of the epidermis and leaves a rich film of protecting agents to prevent dehydration.

Recommended for skins that are already tanned, delipidated and / or dehydrated.

Result: repairs and soothes the skin.

Body Oxygénant:

This repairing, soothing treatment is rich in Corn Oil and the Specific Biologique Recherche Oxygenating Complex. It smoothes the skin and combats cellulite on a daily basis. It is recommended for all skin types and is ideal for treatment of "orange peel skin" and sunburn.

Result: dissolves localized excess fat cells.

Complexe Anti-A:

Complexe Anti-A (A for adiposity or fat cell) is a highly concentrated Botanical Complex rich in Ivy, Fucus and Meadowsweet extracts which help to dissolve localized excess adiposity.

Result: does away with cellulite leaving even textured skin.

Complexe Anti-C:

Complexe Anti-C (C like cellulite) is a Botanical Complex enriched with Ivy, Clematis and Meadowsweet extracts which helps reduce cellulite. Its intensive action tones, detoxifies and stimulates the epidermis with optimal results. It should be used alternately with Complexe Anti-A.

Result: a stimulating detoxifying bath.

Huiles Essentielles Pures:

The blend of Cypress, Thyme, Lemon and Peppermint Essential Oils transform your bath into a delightful energizing and invigorating experience. This product stimulates the elimination of toxins, excess water and fat and also activates blood circulation.

Result: tones and softens the skin and visibly reduces bloating.

Huile Sous-Ombilicale:

Huile Sous-Ombilicale stimulates the elimination of toxins and excess water, helping reduce roundness in the stomach area. It contains a blend of Cedar, Juniper, Pine and Clove Essential Oils and is designed for draining, detoxifying and revitalizing specific areas of the body.

Tip:

We recommend massaging the area beneath the belly button to activate circulation in the pelvic areas.

Result: lightens tired legs and helps improve microcirculation.

Huile Jambes Lourdes:

This is “the” treatment for “heavy legs”. Its formula is enriched with Cypress, Camphor, Sage, Mint and Rosemary Essential Oils and infuses a wonderful sense of well-being.

Tip:

Ideal when combined with Crème Défatigante.

Result: tones and activates elimination.

Huile Dermotonique:

This toning body oil activates elimination and reduces “orange peel skin”. It is recommended for all Skin Instants and is ideal for loose skin slackened by rapid weight loss.

Result: relaxes, helps release tension and infuses a sense of inner peace.

Huile Détente:

This anti-stress treatment is rich in Lavender and Palmarosa Essential Oils, which are renowned for their soothing properties. It relaxes and relieves “heavy leg” sensations. When used in the evening it helps bring on peaceful, repairing sleep.

Lotion for use with iontophoresis

Result: firms and tones the skin.

Ions 50 Corps*/**:

This lotion, for use with iontophoresis, treats cellulite. It is rich in botanical active ingredients with many healing properties. It regenerates and protects the epidermis, activates blood and lymph circulation and stimulates the elimination of toxins and fat.

**For professional use only*

***These products may not be available in some countries*

BODY CARE COSMETIC PREPARATIONS

Body Creams provide fundamental treatments to repair and shape the body, leaving it visibly more beautiful.

During this essential stage treatments are applied to balance, firm and tone the body.

Result: hydrates and replenishes lipid-deficient skin.

Crème Dermo-RL Corps:

This complete treatment, replenishes the skin with lipids and water and promotes their natural synthesis. Its protective and repairing qualities make it a precious help for lipid-deficient, dehydrated and weakened Skin Instants.

Body Creams

Result: regenerates the skin leaving it fully replenished and protected with restored elasticity, softness and radiance.

Emulsion Originelle Régénérante Corps:

This luxurious emulsion soothes and moisturizes the skin, protecting it from harsh climates. It is recommended for all Skin Instants.

Result: tones and balances the body on a daily basis.

Crème MSR-H Corps:

This anti-aging cream moisturizes, regenerates and protects the skin. Its rich, nourishing formula blends yam and soy extract with the Specific Biologique Recherche Oxygenating Complex to enhance the beauty of mature skin, leaving its texture lastingly firmer and more unified.

Result: moisturizes and protects the epidermis of dry hands.

Emulsion Rénovatrice Mains:

This renovating hand treatment leaves a protective film on the skin's surface to protect the epidermis, while also fortifying the nails and softening the cuticles. It is particularly suitable for dry, keratinized and/or dehydrated hands.

Result: leaves the legs feeling light and weightless. soothes muscular pains resulting from physical activity.

Crème Défatisante:

Crème Défatisante is rich in stimulating and toning Essential Oils to leave your legs feeling deliciously light and refreshed.

*Results: slimmer figure
and firmer skin*

Crème Amincissante Anti-C:

This multiple-benefit product provides simultaneous action on different fronts to repair all visible damage caused by "cellulite". It reduces adipocyte mass in volume, staves off disorganization in dermo-epidermal structures, exfoliates and reduces the appearance of orange-peel skin. Rich in plant extracts, ivy, horsetail, nettle and birch bark, the formula stimulates microcirculation. The creamy texture is perfectly adapted to the palper roulé massaging technique. Recommended for Skin Instants with confined fat deposits.

*Result: trims the silhouette
and unifies the skin.*

Crème Amincissante Oxygénante MC 110:

This slimming cream oxygenates and stimulates the epidermis. It trims and tones thanks to its formulation of Essential Oils (Thyme, Lemon, Cypress and Peppermint), which produces a thermal effect that stimulates local microcirculation. These effects are accentuated by the Bio-botanical Complex which contains Ivy, Algae, Horsetail and Myrtle extracts. The skin is oxygenated with the Specific Biologique Recherche Oxygenating Complex which acts as an oxygen vector and also contains important Essential Fatty Acids to repair the epidermal shield. Amino Acid rich Silk proteins reconstitute the NMF (Natural Moisturizing Factor). It is recommended for all Skin Instants and is ideal to reduce localized stubborn adipose fat or for damaged skin (edema, orange peel skin, etc.).

*Result: firms and tones slack,
swollen areas.*

Crème Réparatrice:

This cream tones and protects the epidermis. It is perfect for the bust area and specific areas of the body prone to slackened skin such as the inner arm and thigh, due to its exceptional firming action. It leaves the body feeling invigorated and tightened. It is recommended for areas where the skin is distended and slack.

Tip:

For intensive firming treatment
Crème Réparatrice can be
combined with Sérum
Splénodermine.
Mix 1 ml of serum with
a nut-sized amount of cream.

The Biologique Recherche Massage Glove is an accessory that helps aid in the absorption of active ingredients and enhances treatment results. Its design accounts for the skin's energy flows. One side is covered in thick spikes to prepare the skin and encourage the penetration of active ingredients. The other side has fine spikes to loosen and eliminate stubborn accumulated fat. This silicone glove is very easy to manipulate and can be used to re-model the entire body. It is ideal for use together with Biologique Recherche's various products (exfoliators, moisturizers, firming creams, etc.).

HAIR CARE COSMETIC PREPARATIONS

The hair is structurally equivalent to the face and body, yet it possesses its own very unique features. The epidermis on the scalp is thicker than that on the body and has “hair bulbs” which generously secrete sebum, the hair’s natural protecting agent.

Not only is the hair subjected to environmental aggressions daily, but it is also damaged by the abrasive, tension-active agents contained in shampoos, hair dyes and asphyxiating hair gels, as well as by heat from hair dryers, hair straightners, etc.

Most hair problems are the result of an imbalance of the scalp’s pH, which nourishes the hair bulb.

Biologique Recherche has applied its know-how of skin care to hair care to produce a cutting edge range of products, which help to restore (Initialization Stage) and recondition (Treatment Stage) the scalp. The result is a full, shiny head of healthy hair.

Result: purifies the scalp and balances its pH, preparing it for the next Biologique Recherche hair care treatment.

Lotion P50 Capillaire:

P50 Capillaire restores the hair’s strength and vitality with treatment starting at the root. This multi-purpose lotion gently purifies the scalp and regulates sebum secretion (Poly-Alpha-Beta Hydroxy- Acid complex, balancing and astringent agents). It also boosts hair fiber resistance (moisturizing agents). It is recommended for all Hair Instants and is ideal for seborrheic scalps.

Application method:

Apply a few drops of Lotion P50 Capillaire uniformly over the scalp. Massage gently with your fingertips and leave for 5 to 10 minutes. The scalp is now ready for the next treatment.

Results: eliminates excess sebum without causing irritation.

Bain de Plantes:

A deep-down treatment presented in a needle-nose tube for easy application, this plant-based hair mask gently restores balance in seborrhea and dandruff-prone scalps. Apply strand by strand before shampooing.

Result: fortifies fragile hair and protects it from external aggressions.

Masque Biologique Capillaire:

This nourishing, fortifying mask repairs dry hair. Its formulation combines Yeast and Shea Butter extracts making it ideal for dry, fragile and/or dyed hair. Apply before shampoo to the hair strands and the tips.

Result: rebalances and protects fragile hair.

Shampooing Traitant VIP O2:

This oxygenating “antipollution” shampoo gently washes the hair to protect and rebalance it. Its formula is enriched with the Specific Biologique Recherche Oxygenating Complex that contains extracts of Silk and antioxidant-rich plants to energize the roots. It restores the hair’s volume, sheen and softness. It is recommended for stressed, fragile hair.

Results: purifies, deep-cleanses, reduces sebum levels without drying the scalp out.

Shampooing Traitant Sébo-Rééquilibrant:

This purifying shampoo for frequent washing “rebalances” the scalp without aggressing it thanks to a formula that contains no sodium laureth sulfate. Promotes a healthy and strong scalp. Recommended for Scalp Instants prone to seborrhea and hyper-seborrhea.

Results: deep-cleanses and soothes the scalp.

Shampooing Traitant Dermo-Apaisant:

This gentle protective shampoo works to delicately cleanse sensitive scalps while preserving their natural balance. The soothing and reconditioning active ingredients make it perfectly suitable for the most sensitive scalp types, including cases of scalp or facial surgery. Entirely non-irritant, it is recommended for sensitivity prone and irritated Scalp Instants.

HAIR CARE COSMETIC PREPARATIONS

Hair Care Serums

Hair Care Serums are formulations enriched with a selection of active ingredients chosen specially to treat the specific imbalances the hair is prone to including devitalized hair, seborrheic scalp, etc.

Application method:

According to the scalp type, part the hair and apply about 5 ml of the serum to the whole head. Massage gently in circular movements. Do not rinse off. Use once a day for a 1 to 3 month period, or occasionally after shampooing.

Results: restores radiance and facilitates detangling.

Baume Capillaire:

This conditioner repairs and smoothes hair scales. Formulated without silicones, it facilitates detangling, protects hair against external aggressions and enhances its shine. Recommended for damaged, dull, coarse and difficult to detangle Hair Instants.

Result: this energizing anti-age hair tonic increases hair density and leaves the hair healthy and strong.

Complexe Cegaba+Bioproline:

This extensive hair care treatment is specifically blended to optimize the fortifying and revitalizing action at the root of the hair.

Result: balances the pH of scalps that produce excessive sebum.

Complexe Capillaire:

This energizing and balancing Phyto-Complex treatment for oily hair is rich in Silk proteins, Aloe Vera extract and Vitamins.

*Result: leaves the hair soft,
shining and full of bounce.*

Lotion Kéractive:

This leave-in treatment is enriched with repairing, protecting Botanical Extracts specially formulated to protect and fortify the hair fiber. It acts like a dry conditioner enhancing the beauty of your hair and making it easier to comb and style. Apply Lotion Kéractive on wet or dry hair on the whole hair length avoiding the roots, to fortify and protect the hair against daily external aggressions. Recommended for dry, fragile Hair Instants.

Professional Treatment

Biologique Recherche Beauty institutes strive to understand the skin in order to enhance its beauty. Their professional beauty treatment programs are comprised of seven stages during which you are pampered by the expert hands of trained estheticians.

- 1 An individual and personalized cosmetic assessment of the epidermis.**
- 2 A moment of relaxation:** including a proprioceptive massage and make-up removal using cleansing milk.
- 3 Preparing the skin:** application of Lotion P50 to eliminate impurities while respecting the acid pH of the epidermis.

4 Application of the mask: to prepare, condition and stimulate the skin.

5 Remodeling Face® Machine: combinations of four currents used to improve the skin's volume and radiance.

6 A customized cocktail of pure Quintessential Serums: prepared for your skin's specific needs by the esthetician.

7 The finishing stage: each in accordance with the skin and its needs, Biologique Recherche creams and finishing serums are applied to prolong and optimize the treatment with complementary botanical and marine active ingredients.

The same rigor and methodology is applied in beauty care treatments for the face, body and hair.

Wider-looking eyes, more pronounced cheekbones, less marked wrinkles and a more clearly defined facial contour: some of the effects magically produced by the Remodeling Face®.

Remodeling Face®

A state-of-the-art bio-electrotherapy for tailor-made results.

Remodeling Face®* combines the power of four currents:

- A galvanic current to improve the absorption of active ingredients.
- A low- and mid-frequency current to reshape and tone.
- An a-thermic high frequency pulsed current to revitalize the epidermis.
- Electroporation: a high-frequency impulse current to make the upper layer of the epidermis permeable and

help the active ingredients migrate into the cells through the temporary creation of multiple wells into their surface.

Precise adjustment of the parameters enables the remodeling process to be activated in both the skin and the muscles.

Remodeling Face® Machine and Biologique Recherche's exclusive skin care products are complementary and improve one another's performance for both body and face care treatment.

The Skin Instant® Lab

A keystone in the Biologique Recherche methodology, this unique analysis, diagnosis and product/treatment prescription system also monitors changes of the Skin Instant® over time, providing dynamic assistance with the treatments advised.

The Skin Instant® Lab* consists of five probes (measuring hydration, trans-epidermal water loss, elasticity, pigmentation and sebum levels) linked into a computer equipped with an exclusive diagnosis and analysis software program developed by Biologique Recherche.

Using our expert's dermo-cosmetic analysis and the measurements registered, the Skin Instant® Lab, connected to the Biologique Recherche database, recommends a selection of Biologique Recherche products and treatments that are totally appropriate for each individual Skin Instant®.

Ambassade de la Beauté Champs-Elysées - Paris

“Haute Couture” Cosmetic

In 1993, Biologique Recherche established the Ambassade de la Beauté, its flagship beauty institute located in an exclusive hotel set back from the street by its own courtyard on the Avenue des Champs-Elysées, in central Paris.

Each area of this beauty institute is specially designed for the treatment protocols. In a peaceful atmosphere of cozy luxury and technical surfaces, everything is devoted to holistic beauty.

The institute's interior design and furniture feature the brand's colors of blue, white and gold and Biologique Recherche's trademark sophisticated touch. A team trained in the brand's methodology serves clients seeking effective, innovative beauty care treatments.

First, a unique assessment combining an analysis of the client's skin and life style is carried out. The appropriate treatment protocol is then applied. At each stage of the treatment, the beautician interprets the skin's reactions and adapts her gestures accordingly. The formulas act like a prescription tailored to suit each individual case.

Result: The famous Biologique Recherche Glow.
